How it works

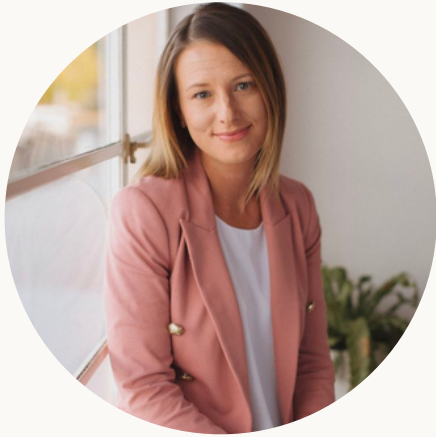

“

I was introduced to Mel at a low ebb of my career in communications, and her coaching was instrumental in giving me both the perspective and lift I needed to make decisions with confidence. Through her vast experience in the comms space, Mel's advice was relevant and insightful, and helped me to see the professional and personal barriers that were in my way. Since completing my coaching sessions I feel a renewed sense of positivity and have a better understanding of how to succeed. I would not hesitate in recommending Elm's services to anyone looking to reinvigorate their career, or for some guidance to make sure they're moving in the right direction.
